CURA TATTOO

01 Three hours after your tattoo is finished, remove the plastic-wrap dressing.

02 Gently wash the tattoo with mild soap to remove any traces of blood or cream; pat dry with absorbent paper.

03 Let the tattoo breathe for 5–10 minutes.

04 Cover it again with plastic wrap.

05 Repeat every three hours until bedtime and sleep with fresh plastic wrap.

06 The next morning, remove the wrap, wash as described above and apply a very thin layer of cream.

07 Leave the tattoo uncovered, unless there is a risk of contact with dust or dirt.

08 Apply soothing cream gently twice a day during the first week. The cream will absorb and allow the tattoo to breathe.

09 The healing period usually varies from 10 to 20 days.

10 Avoid soaking in a bath. Showering is fine, but do not rub the tattoo with a sponge.

11 Avoid swimming pools, saunas, the sea, direct sunlight, dust and dirt.

12 Wear cotton clothing in contact with the tattoo.

13 Do not scratch if it itches.

14 Small scabs may form; do not remove them. They will come off on their own.

If you have any questions, contact the studio or your tattoo artist directly.
